

SENIOR RESEARCHER IN BUSINESS MODEL INNOVATION (W/M/D)

38,5 h/w in Graz

Are You interested in Business Model Innovation? Do you enjoy working in a stimulating, multicultural environment? Would you like to lead scientific and/or industry projects and contribute to Data-Driven Business Model Innovation?

If yes, become part of the Know-Center!

YOUR TASKS:

- You lead research and industry projects that focus on supporting organizations (SMEs, large companies or non-profits) in developing business models that exploit the possibilities of data analytics and artificial intelligence (AI). You are interested in working in different areas such as environment & sustainability or production & logistics
- You support the expansion of existing tools and methods for the development of data-driven and AI-supported business models in various domains.
- Your research focus is in information science, economics, innovation management, business informatics, or related research areas; in particular, interdisciplinary research in the fields of human-machine interaction or science and technology studies is also possible. You will publish your research results in prestigious journals and conferences.
- You will work in the interdisciplinary Digital Transformation Design Research group headed by Assoc. Prof. Viktoria Pammer-Schindler. The research group develops tools and methods to make the best possible use of AI and other modern technologies in knowledge-intensive, creative and strategic contexts.

YOUR QUALIFICATIONS:

- PhD or advanced PhD studies in information science, economics, business informatics, industrial engineering or a similar discipline
- International research profile in at least one of these areas
- Experience in managing scientific projects is an advantage, ideally in EU projects
- First experience in the acquisition of research projects (national and international) and industrial projects is an advantage
- Fluency in English (at least B2 level), knowledge in German is an advantage

WE OFFER:

- Interdisciplinary research center with the opportunity to exchange ideas with researchers in the field of Trustworthy AI from various disciplines such as AI, HCI, legal aspects and innovation management
- Cutting-edge projects in collaboration with national and international key players
- Very good work-life balance, flexible working hours and teleworking
- Exciting opportunities for professional and personal development
- Dynamic, creative and multi-cultural team
- Company events, health promotion, public transportation allowance
